

## Manual Focus Gauge (MFG) Replacement Fusion Pro 32 & 48

### Parts Required

- CS1032 - Assy, Manual Focus Gauge

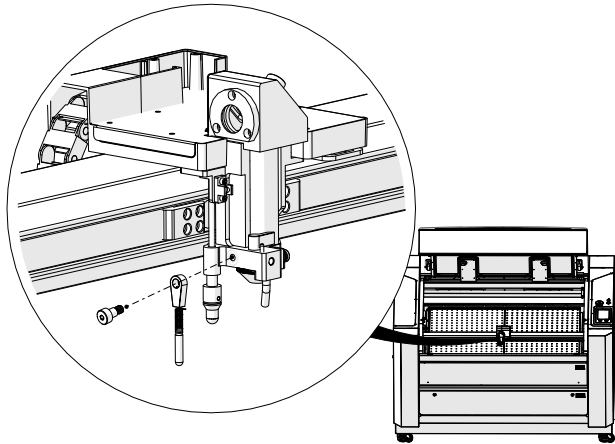

### Tools/Materials Required

- 3/32" Allen Wrench

# Manual Focus Gauge (MFG) Replacement

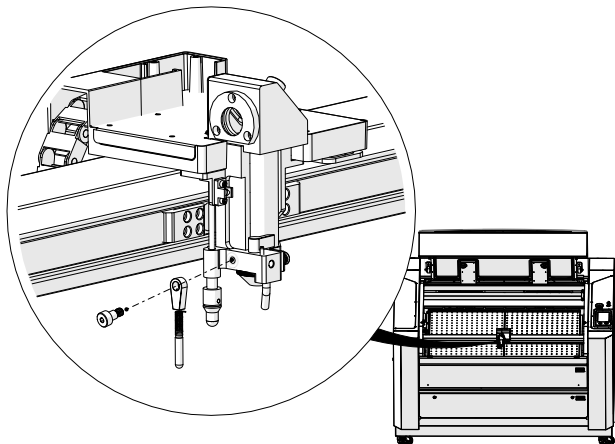

## MFG Removal

1. Loosen and remove the 3/32" Allen screw that holds the MFG in place and remove the MFG.

## MFG Installation

1. Place the MFG into position. Install and tighten the 3/32" Allen screw:

After installing a new manual focus gauge, use the auto focus feature to move the table to the calibrated focus height, then lengthen or shorten the MFG to match the focus height.
